

PS Financials

PS CLOUD

PS Financials provide a private and secure cloud service with 100% uptime – ‘PS CLOUD’. The PS CLOUD service is cost effective, removing the large, upfront capital investments associated with setting up and maintaining a resilient and effective IT infrastructure.

PS CLOUD User Benefits:

- ▶ PS CLOUD provides 100% scheduled uptime, avoiding any frustrating drops in service, allowing our users to have full access, from anywhere 24/7/365.
- ▶ Support is maximised as we are able to support your PS Financials applications more effectively and proactively manage the IT infrastructure.
- ▶ By implementing PS CLOUD you have no capital expenditure on expensive Servers, MS Office, MS SQL server licenses or staff costs. You benefit from low, defined running costs that are paid quarterly.
- ▶ PS CLOUD is located in a highly resilient, ISO 27001, Tier 3 data centre. Your PSF data is automatically backed up to 2 secure and independent locations ensuring business continuity in the event of a disaster.

- Reduced IT support needed
- No server needed / or capital expenditure
- No electricity / aircon / license management
- Low defined running costs
- Includes all necessary Microsoft Office & SQL Licenses

PS CLOUD Key Benefits:

- ▶ Reduced IT support needed
- ▶ No server needed / or capital expenditure
- ▶ No electricity / aircon / license management
- ▶ Low defined running costs

- ▶ Accessible from ANYWHERE (with an internet connection)
- ▶ Automatic system monitoring and data back up to 2 separate secure locations ensures business continuity
- ▶ PSF support both the application and hardware environment it operates on
- ▶ Rapid deployment
- ▶ Mobile Reports
- ▶ Live Cloud Benchmarking

2000+

PS Financials users have PS CLOUD as their Platform as a Service (PaaS) solution

“Consolidating our cloud storage and finance management system with PS Financials has relieved a lot of responsibility away from my colleagues, enabling them to focus their time on other areas. I have the utmost trust in PS CLOUD to keep our data totally secure and accessible at any time, something I value immensely.”
