

PS Financials
Powering Better Business Decisions

PS Financials is the innovative Financial Management System chosen by over 3,000 charities, in 58 countries, providing them with a proven accounting, budgeting, purchasing and reporting solution.

Imperial College Healthcare Charity

Previous System:

Harlequin

Benefits:

"PS Financials allows me to grid, pivot, sort and filter columns within the enquiry screens, saving a lot of time. Previously, I had to export all data to Excel. PS Financials is very easy to use and has simplified the process of cost allocations, it automatically splits costs over a period of time."

Reporting:

"Management accounts are far less time-consuming to produce. PS Financials comes as standard with a library of web-reports and in addition we can design reports exactly to our requirements. Our old system used to take 2 days to produce Management Accounts - PS Financials has reduced this to 5 minutes."

Power BI:

"The reporting dashboards in PS Financials look awesome and are fantastic for reporting to trustees. We can now give our trustees a high-level overview of any potential risk, they can now identify good/poor areas and plot these over time to predict the future outcome."

Hospital Charity clients include:

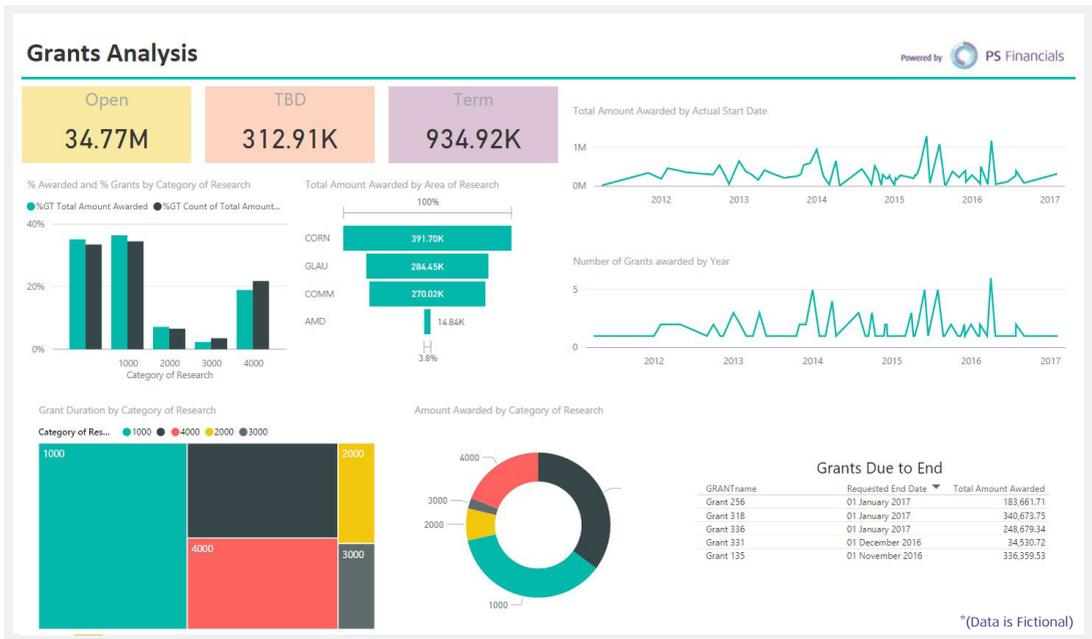

“

"The system is so flexible it can do anything we want it to do."
